Art Unit: 3634

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yuge.

Yuge discloses a structure of a door opening/closing apparatus comprising an arm member (42) coupled to a door (20) and a vehicle (10), a driving unit (30) inside of the vehicle body to move the arm member (42) through a space (13) in which the arm member (42) pushes the door (20) open and pulls the door (20) shut, and a seal member (14) attached to the body panel (11) and having an opening for the arm member (42) to project therethrough.

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent application to Wygle et al. discloses an arm member having flexible seal members (paragraph 0038) 38 and 60.
